

Project Name: Kitchen Story Screenshots

Date: 25 July 2023

Project Objective: To create an e-commerce portal that lets people shop basic food items on their website.

Developer: Teboho Innocent Mosiea

1. Project Initialisation and Connecting to server

The screenshot shows a Visual Studio Code window with a terminal running the 'ng serve' command. The terminal output displays the Angular CLI version (15.0.0-next.0) and the project name (Kitchen Story). It lists dependencies on vulnerable versions of loader-utils, semver, and webpack. A security warning is shown for semver (Severity: moderate) and webpack (Severity: high). The terminal also shows the initial chunk files and their sizes, and the build time (34144ms). The Explorer sidebar on the right shows the project structure, including files like .angular, node_modules, src, angular.json, package-lock.json, package.json, README.md, tsconfig.app.json, and tsconfig.json.

```
ng serve
